ENGLAND

On the death of the last of the Marian Bishops in the reign of Elizabeth, the Catholic Hierarchy in England became extinct. It was restored Sept. 29, 1850, by Letters Apostolic (*Universalis Ecclesiæ*) of Pius IX. when the Metropolitan See was transferred to Westminster. By Letters Apostolic of Oct. 28, 1911, of His Holiness Pius X. the Province of Westminster, which had fifteen Suffragan Sees, was divided into three Provinces—Westminster, Birmingham and Liverpool. With Westminster remain the dioceses of Northampton, Nottingham, Portsmouth, and Southwark. To Birmingham were assigned the dioceses of Clifton, Newport, Plymouth, Shrewsbury and Menevia. The remaining Sees of Hexham and Newcastle, Leeds, Middlesbrough, and Salford were assigned to Liverpool. On February 7, 1916. Newport was raised to archiepiscopal rank under the name of Cardiff; and, with Menevia as a Suffragan See, was formed into a fourth province. In 1917 the county of Essex was separated from Westminster and made into a separate diocese (Brentwood) of the Province of Westminster. In 1925 the See of Lancaster was carved out of Liverpool and Hexham and Newcastle.

The Catholic Population of England is about 2,150,000.

Since the founding of our studios in the year 1888, it has been our endeavor to make each new installation better in some way than the last. We have never been contented to repeat successful past performances. Each new project is attacked with fresh vigor, and created only for the place for which it is destined. This spirit, with the invaluable background of forty-three years' experience, accounts for the individual touch that is associated with our work.

improve hearing . . . subdue noise

THE message of the priest is lost when reverberation combats his voice and prevents his words from reaching to the farthest pew. The effort of the teacher is partly nullified when noise disturbs the class. No need for either condition! Because an easily applied fibre tile . . . Acousti-Celotex . . . will correct both faults.

Architects endorse Acousti-Celotex. They know it is made to exact standards on principles well established by technical research in the field of architectural acoustics. They know there is no guesswork in the analysis that precedes each installation or the installation itself. This means that you can be sure of satisfaction before a dollar of your money is spent.

ACOUSTI-CELOTEX
FOR LESS NOISE—BETTER HEARING

Acousti-Celotex is applied in old as well as new edifices. It blends with or becomes a distinct part of the architecture and decoration. It can be left in natural finish or decorated in colors. Various sizes give ample opportunity for pattern design.

In the photograph you see an example of reverberation correction with Acousti-Celotex in The Immaculate Conception Church, Waterbury, Connecticut (Maginnis & Walsh, architects). The tiles were easily applied even in the domed vaults shown. They were left in natural finish.

Write to us, or ask the nearest Acousti-Celotex contracting engineer for an analysis of your own Church. No obligation. The Celotex Company, 919 N. Michigan Ave., Chicago.

ACOUSTICS

Johns-Manville stands pre-eminent in the development of acoustical materials which can be incorporated in the design of new interiors or installed in rooms already completed. Some of these interior finishes produce the effect of rough stone or plaster while others are perfectly adapted to the application of costly mural painting or decoration.

Our staff of trained engineers is prepared to furnish without charge an acoustical analysis and recommendations for needed treatment, in rooms already completed or those being designed. This service applies to church and school auditoriums, refectories, swimming pools, gymnasiums, and the corridors and various patient and utility rooms in hospitals.

The magnificent *Ostensorium* (pictured here), made for the new Della Strada Chapel of Loyola University, Chicago, is executed in the ever-popular Romanesque Style, with the four Evangelists. The inscription is in fine inlaid enamel, amethyst mounting, and crowned with a monogram of Christ with the fish symbol. The complete *Ostensorium* is richly hand-hammered, and is mounted with many precious stones. Height 25½ inches, Sterling Silver, all heavily gold-plated.

Gentlemen:

I have been asked to write a word or two relative to the Monstrance made by your firm for the new Chapel, Madonna Della Strada, of Loyola University.

As in all previous work I received from your firm, I find the same masterly touch combined with an artistic conception and a perfection of finish, which make any article from your hands a real work of art. The Monstrance combines the symbolism of the Church and the liturgical expression centered about the Blessed Sacrament. It is a worthy throne, as worthy as human touch can make it, for Christ, the King.

Assuring you of my expressions of gratitude and giving my unqualified endorsement, I am,

With expression of deep regard,

Very sincerely,

SKINNER ORGAN COMPANY

The classic, traditional tonal structure has always been the basis of all Skinner designs, and to this foundation we have added such voices which have been proven of value and in harmony with the nature and literature of the organ. This adherence to fundamental principles has resulted in an ideal instrument for interpreting the traditional music of the Catholic service.

A Skinner organ is installed in the Church of St. Paul the Apostle, the home of the famous Paulist Choristers in New York City, and other Skinners are giving service in many other Catholic Churches.

More cleaning in less time

BAN replaces muscle power with chemical energy in cleaning—does away with rubbing and scrubbing. Thousands now use this white powder to do all their cleaning because it saves time and labor, goes five times as far as ordinary soap and grit compounds, banishes the most stubborn dirt and is at the same time mild and safe. Ban is the most modern cleaning method known to science; it saves money in actual use—right on the job.
